PROFILE

Newly graduated sports scientist targeting wearable and female-performance technology. Elite applied experience with Scottish Rugby (GPS, Power BI) plus a self-built athlete-monitoring app. Equally comfortable handling data and translating it into coaching decisions.

EDUCATION

2022 – 2026

BSc (Hons) Sport and Exercise Science with Professional Placement,
University of Bath

Bath, Somerset

Relevant modules: Sports Biomechanics, Functional Anatomy and Biomechanics, Sports and Exercise Medicine, Further Biomechanics, Research and Study Skills. Dissertation: 3D motion-capture analysis with MATLAB visualisation to model and predict 180° change-of-direction performance. Grade: 2:1.

2016 – 2021

International Baccalaureate, 38 points (6,6,6,7,6,5), Fettes College

Edinburgh, Scotland

HL: Physics, Maths, Art. SL: History, Spanish, English. 10 GCSEs at grades 7–9, including Maths and English.

WORK EXPERIENCE

2024 – 2025

Sports Scientist, Scottish Rugby Union

Edinburgh

A placement year embedded across three national programmes, delivering applied sports-science and performance-data support to squads of 40–50 players across a campaign in an elite, professional environment.

Men's National Team

- Collected and analysed GPS tracking data across training and matches to inform load management.
- Built Power BI reports and dashboards to shape training decisions week to week.
- Supported strength-and-conditioning coaches on training and return-to-play protocols.

Women's National Team

- Ran sports-science sessions independently, including player monitoring, testing and data collection.
- Handled and analysed performance data, communicating insight directly to coaches.

National Talent Pathway

- Assisted with player profiling, physical testing and strength-and-conditioning.
- Analysed performance data across the pathway squad to support player development.

2023 – 2026

Lacrosse Coach & Strength and Conditioning Coach, University of Bath

Bath

- Designed and ran weekly training, strength-and-conditioning programming, selection and return-to-play. This applied environment informed my athlete-monitoring app (see Projects).

Jan – Jul 2022

Sports Coach, Fettes College

Edinburgh

- Coached lacrosse and tennis across age and skill levels; qualified as a Level 1 umpire.

2022 – 2026

Maths and Physics Tutor

Edinburgh

- Tutored Fettes College students, including those with learning disabilities, in maths and physics.

PROJECTS

2023 – 2025

Athlete Wellbeing & Injury-Tracking App

AppSheet · Python

- Designed and deployed an app (built in AppSheet with Python) to monitor fatigue, wellbeing and injury risk across a 20-athlete squad, with daily player check-ins feeding a live dashboard.
- Flagged injuries and tiredness levels so the coach could adjust training session length and intensity week in, week out, optimising match performance.
- Full walkthrough in the attached pitch deck.

TECHNICAL SKILLS

Data & code

Python · Power BI · MATLAB · AppSheet · data reporting & dashboards · MS Office

Sports science

GPS & motion capture · athlete load monitoring · force-time analysis · return-to-play · strength & conditioning

CERTIFICATIONS

- Functional Fitness Coaching Level 2 · British Weightlifting Coaching Level 1.
- England Lacrosse Umpiring Level 1 · Emergency First Aid.

SPORT & LEADERSHIP

- Full Blue Award for sporting excellence, University of Bath (2026), awarded for performance at university and international level.
- Captain, Bath Women's 1st Lacrosse (2025–26); led training, selection and team culture.
- Scotland Women's National Sixes Team (2026); Scotland Women's B Team and U18/U21 Home Internationals.

INTERESTS

Lacrosse (Scotland squad training & BUCS competition) · coaching & player development · coding & app creation · tennis & hockey · ballet (Scottish Ballet) · art & photography.
